

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (Previously Presented): An information storage medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

- a control information area for storing,
 - still picture audio/video file information table including still picture audio/video file information for managing the still picture video object, and
 - program chain information including cell information for one of a movie video object of the audio/video data and the still picture video object of the audio/video data,
- wherein said cell information includes cell general information containing information of a cell type corresponding to the still picture video object,
 - said program chain information includes said cell information corresponding to a still picture cell,
 - said cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,
 - said still picture audio/video file information includes group information of the still picture video object,
 - said group information includes said still picture VOB entries,

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said still picture VOB entries include entry type information containing number information indicating whether the sub-picture stream is included, and

the information recording/reproducing apparatus accesses the control information area to reproduce the still picture video object.

Claim 17 (Previously Presented): An information recording method for recording data on a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

still picture audio/video file information table including still picture audio/video file information for managing the still picture video object, and

program chain information including cell information for one of a movie video object of the audio/video data and the still picture video object of the audio/video data,

wherein said cell information includes cell general information containing information of a cell type corresponding to the still picture video object,

said program chain information includes said cell information corresponding to a still picture cell,

said cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,

said still picture audio/video file information includes group information of the still picture video object,

said group information includes said still picture VOB entries, and
a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said still picture VOB entries include entry type information containing number information indicating whether the sub-picture stream is included,
said method comprising:
recording the audio/video data on the data area; and
storing the control information on the control information area.

Claim 18 (Previously Presented): An information reproducing method for reproducing data from a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,
still picture audio/video file information table including still picture audio/video file information for managing the still picture video object, and
program chain information including cell information for one of a movie video object of the audio/video data and the still picture video object of the audio/video data,
wherein said cell information includes cell general information containing information of a cell type corresponding to the still picture video object,
said program chain information includes said cell information corresponding to a still picture cell,
said cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,

said still picture audio/video file information includes group information of the still picture video object,

said group information includes said still picture VOB entries, and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said still picture VOB entries include entry type information containing number information indicating whether the sub-picture stream is included,

said method comprising:

reproducing the control information from the control information area; and

reproducing the audio/video data from the data area.

Claim 19 (Canceled).
